UPDIVISION

12 years of developing powerful software for companies all over the world.

Since 2010, UPDIVISION is helping companies and entrepreneurs solve real-world challenges through software. Our brilliant engineers, UI designers, testers and project managers are disrupting entire industries. They create apps that save millions of dollars in operational costs or give a hand in the making of the next unicorn.

We develop long lasting partnerships with our clients and make sure their business benefits from the input of our talented people. And in 12 years, we`ve made a lot of friends all over the world.

For our quick portfolio, picture these numbers:
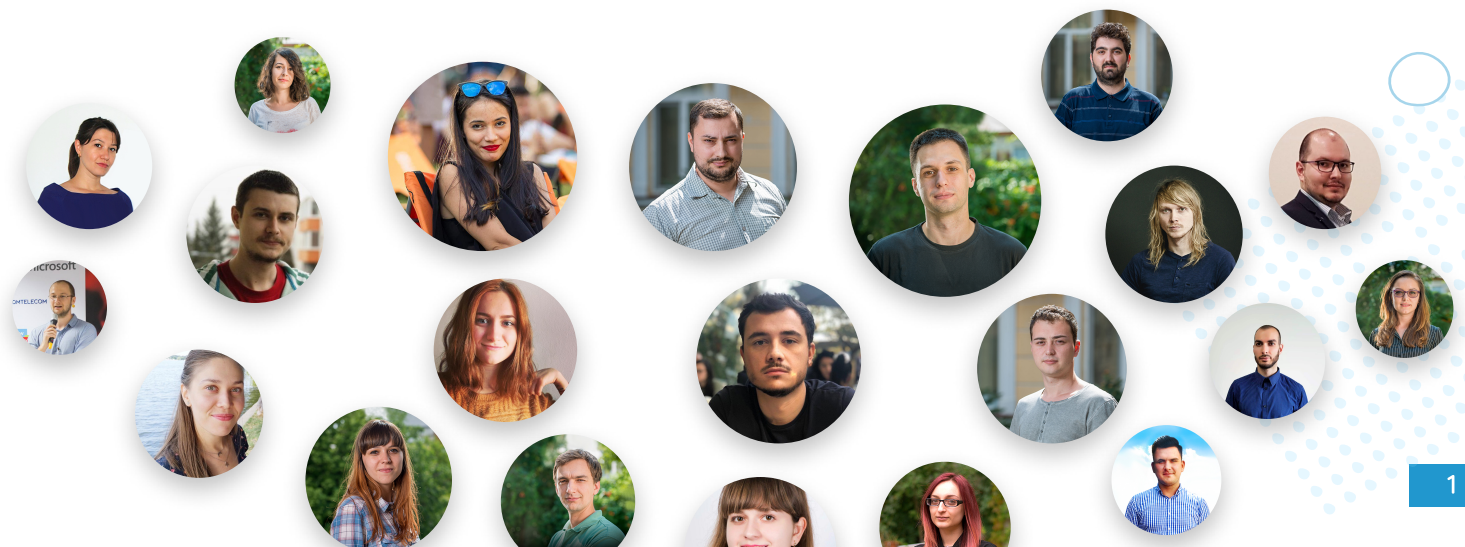

100+
delivered projects

10+
industries

20+
countries

12+
years of coding

More than 50 experts are ready to make your software idea win big

UPDIVISION

We turn your ideas into web & mobile apps. #unicornmaker

You bring the industry insights and we build a killer MVP in **five steps**. Read all about them below.

1. FIRST IMPRESSION EVALUATION
We make a good first impression

You'll get an initial, free estimate (time & costs). Our advice is based on 12 years of building complex apps, so you have everything you need to make an informed decision.

2. PRODUCT DISCOVERY
This is how unicorns are conceived

Validate and improve your app idea without having to write a single line of code. You`ll get a clearer sense of the look & feel of your app and the basic flow.

3. TECHNICAL SOLUTION & ESTIMATES
Time, money and technology

In this stage, we answer the three How's:
1) How are we going to build it?
2) How long will it take? & 3) How much will it cost?

4. PROJECT PLANNING
We plan for the worst, you get the best

We break down features into tasks and prioritize them. We decide on the number of sprints, so there is a deliverable to test and improve on after each sprint.

5. SOFTWARE DEVELOPMENT
Development that keeps delivering

You can see milestone by milestone how your app is shaping up. Then there's the big launch day and afterwards we follow up with continuous support.

UPDIVISION

Take advantage of our talent pool, processes and know-how.

Get skilled developers

Our developers have been working remotely and across distributed teams for years. We always fit right in, due to good communication habits and powerful collaboration tools.

OR

Get the entire dev team

More than just coders, you get a team of people with experience working together and an ecosystem of tools, skills and know-how.

5 reasons to work with us, instead of a freelancer:

Working from an office with like-minded devs brings out the best in everyone: motivation, good practices, useful ideas.

1. More reliable & easily accountable.
2. Better & enforced coding practices.
3. Always up to date with the latest tech.
4. Replace or extend your team fast with people of the same (proven) caliber.
5. Get indirect feedback & ideas from an extended team. Our devs talk to each other when they face a challenge.

PEOPLE IN A TYPICAL DEV TEAM

Developers

Do the actual coding and bug fixing. Take care of servers, deployment and maintenance.

Testers

Write testing scenarios and, based on these, they run manual and automated tests.

PMs

Assign tasks in project management software. Plan dailies, sprints and Scrum meetings.

UI Designers

Make sure apps are intuitive and information is well structured. Take care of wireframes & user flows.

UPDIVISION

Our engineers are top 1%. Because we specialize only in a few powerful technologies.

Recognized Laravel industry experts

Our developers are shaping the Laravel ecosystem. Open source contributions, complex software for our clients and Backpack for Laravel – an admin panel used by half a million developers. We did it all.

Vue.js coding that won awards

Laravel comes hand in hand with Vue.js. So it's only natural that our engineers mastered it. And a lot of people agree. Our Vue.js themes made under Creative Tim brand are constantly top 5 on Product Hunt.
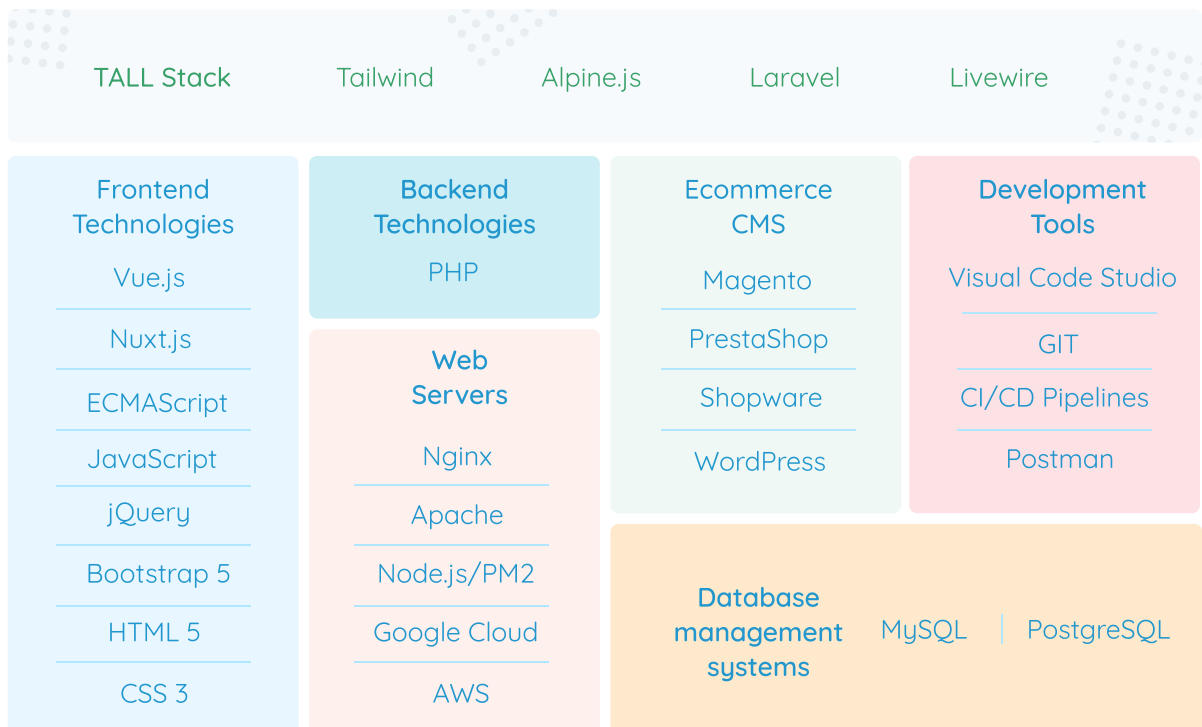

LARAVEL CERTIFIED COMPANY

We`re a straight-A Laravel certified company

(A⁺) we demonstrated our expertise in building complex applications with Laravel

(A⁺) we employ several Laravel certified developers

This is our technology stack. Just this.

You cannot be master of all trades, so our developers focus entirely on a stack capable of building unicorns. Microservices, API-based development, flexible server architecture, heavy-duty database design and load balancing capabilities are in our day-to-day mix.
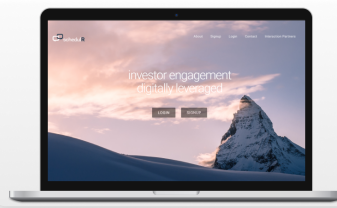

TALL Stack	Tailwind	Alpine.js	Laravel	Livewire

Frontend Technologies	Backend Technologies	Ecommerce CMS	Development Tools
Vue.js	PHP	Magento	Visual Code Studio
Nuxt.js		PrestaShop	GIT
ECMAScript	Web Servers	Shopware	CI/CD Pipelines
JavaScript		WordPress	Postman
jQuery	Nginx		
Bootstrap 5	Apache		
HTML 5	Node.js/PM2	Database management systems	MySQL │ PostgreSQL
CSS 3	Google Cloud		
	AWS		

UPDIVISION

Some portfolio examples, curated for forward thinking.

Web Apps | Transportation

OviDrive Fleet ERP

Your entire fleet of cars is now controlled by touch and click.

Web Apps | Finance

schedulR Investor Events

Manage meetings between companies and investors.

Web Apps | Healthcare

Doctor France Platform

Medical services from France to the world. Find doctors faster.

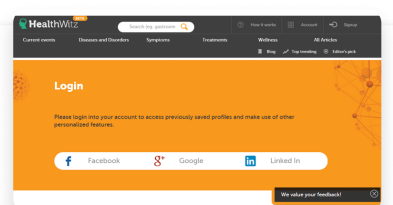

Web Apps | Communication & Media

OLFFI Film Fundraising

Have a great idea for a movie but lack the budget?

Web Apps | Logistics

Smart Send Shipping

An app connecting webshops and shipping companies.

Web Apps | Healthcare
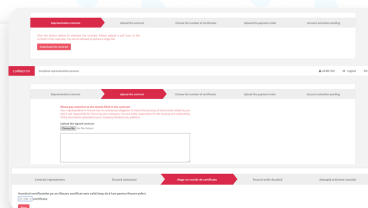

HealthWitz Medical Advice

HealthWitz lays genuine medical advice at your fingertips.

Web Apps | Services

DroneSurv Measurement

Send self-driving drones to take measurements.

Web Apps | Transportation
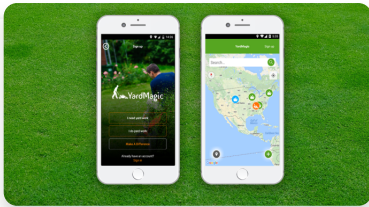

Macron Management

Help transport companies comply with the new French labour law.

Web Apps | Education

JurassicWorld Education

How do you make learning about DNA more fun? Through games.
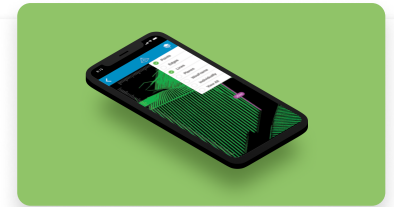

Mobile & Web Apps | Services

YardMagic

Mobilr app that connects local lawnscapers with lawns.

Mobile & Web Apps | FMCG

JustNow

Prevent unnecessary food waste and get food at the lowest prices.

Mobile & Web Apps | Services
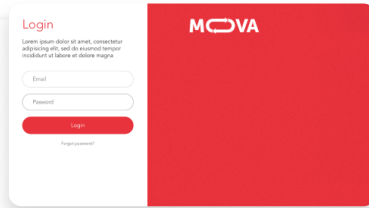

VideoSurv Measurement

Automate a core part of the roofing industry - measurement.

Mobile Apps | Augmented Reality

eVista Augmented Reality

Bring print advertising to life with augmented reality.

Mobile & Web Apps | Logistics

Moova: Uber for Big Boxes

Match pick-up truck drivers with people needing to move.

E-commerce | Beauty

Melkior Beauty E-commerce

We gave this pretty e-commerce the power it needed.

E-commerce | Payments

Paybilla Payment Gateway

A complex online payment solution built from scratch.

E-commerce | Jewelry

Kogayon E-commerce

A powerful e-commerce for powerful Dacic-inspired jewellery.

E-commerce | Discounts

Oringo Group Buying

A deal platform with huge discounts and unique offers.

Social Platforms | Education

Prof 21

We built an educational platform for teachers in Romania.

Social Platforms | Education

HackerJam Hackathons

A complex platform for running successful hackathons online.

Social Platforms | News

Union News Portal

A complex news portal and community built from scratch.

UPDIVISION

Our clients love us. They told us time and time again.

FED3RAL, United States

"UPDIVISION took over a previously "failed" B2B project of mine and made it a success."

Aaron West
CEO at FED3RAL

Just Now, United States

"We consider them an integrated part of our team. They have never let us down."

Brad Constantinescu
CTO at Stone Soup Tech

Odin Dev, United States

"They are hands-on, great programmers and always thinking of ways to improve."

Gary Norton
CEO at Odin Development

Alien Intelligence, Australia

"UPDIVISION is one of my few partners that can always crack a hard problem."

Ovidiu Radu
CEO at Allien Intelligence

OviDrive, Australia

"From idea to specs, UX design and coding – UPDIVISION was there to share the ride."

Ron Sullivan
Co-founder at OviDrive

StaffTalk365, UK

"Together, we have created a number of successful Business Intelligence applications."

TimothyPoyntz
CEO at StaffTalk365

Ekomurz, Belgium

"I highly recommend UPDIVISION developers for complex web development."

Wim de Nocker
Magento consultant

Smart Send, Denmark

"I was constantly impressed by the technical solutions UPDIVISION came up with."

Anders Bilfeldt
CTO at Smart Send

schedulR, Switzerland

"UPDIVISION helped us disrupt the traditional broker model for corporate access to investors."

Kilian Maier
CEO at Interaction Partners

Sales-Lentz Group, Luxembourg

"They were fast and made sure everything was ready before the big opening."

Manon Junio
PM at Sales-Lentz Group

Tech Entrepreneur, France

"Their straightforward approach always brings results and helps solve issues quickly."

Jeremy de France
Tech Entreprenur

Cyber Ghost, Germany

"Once you give them the general idea, they`re able to execute it flawlessly."

Robert Knapp
Founder at Cyber Ghost
